### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's filing dated February 17, 2006. The following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23-25 are rejected under 35 U.S.C. 102(e) as being anticipated by EP 1365395A2.

The reference shows a probe type recording and reading apparatus comprising: a recording medium having recording areas 5, 41, a support device disposed in a relationship to the medium 22, 23, a plurality of probes (first and second probes) for reading and recording data 21, a displacement mechanism for displacing the support member relative to the medium 12, a position control area (servo data) for positioning the probes (tracking) 42, a first detecting device for detecting the positional data (tracking) RES, a first recording and reading device 3, and a displacement controlling device for controlling the probes (servo control) fig 10 and it's description.

With respect to the limitations of claims 24 and 25. the claims read on tracking servo control read from the areas 42 by probe 21 to control the data reading and writing into areas 41 by the plurality of probes 21.

Claims 20-22 and 26-35 are allowed.

Art Unit: 2627

None of the cited prior art shows or teaches a probe type data recording and writing apparatus having a medium divided into a plurality of areas arranged in a matrix, one of the division areas is a positional control area and disposed in a central portion of the recording medium as shown in fig 3 elements 20, 21, 22 and 22A.
